CLEARINGHOUSE METHODS AND SYSTEMS FOR PROCESSING
BIOINFORMATIC DATA

Abstract of the Disclosure

Bioinformatic data is accepted from corresponding bioinformatic data suppliers. A subset of the bioinformatic data is analyzed to generate bioinformatic data analysis results. The bioinformatic data analysis results are provided to at least one bioinformatic data analysis results customer. The bioinformatic data suppliers that supplied the subset of the bioinformatic data are compensated in return for their supplying the subset of the bioinformatic data that was analyzed to generate the bioinformatic data analysis results that were provided to the at least one bioinformatic data analysis results customer.
